### **Tiger Airways seeks Australian Domestic Air Operators Certificate**

Mr. Tony Davies, Chief Executive Officer of Tiger Airways announced in Sydney today that Tiger Airways intends to apply for an Australian Domestic Air Operators Certificate as the first step to providing low cost air services on selected Australian domestic air routes.

Mr. Ian Kew, Chief Executive Officer of Northern Territory Airports welcomed this announcement.

Mr. Kew said: "Although specific routes are yet to be announced, Darwin International Airport, being Tiger Airways first international gateway to Australia, expects to be a key airport on Tiger Airways domestic route network.

"Tiger Airways is now the preferred airline for many of the Darwin travellers to Singapore and Asian cities beyond and increasingly is being used by travellers from other parts of Australia to access very affordable international air fares.

"Tiger currently serves 15 Cities in Asia, with plans to add many more and already Darwin is receiving growing visitor numbers from the Asian region because of Tiger Airways.

"Domestic operations by Tiger Airways will accelerate this use of Darwin as an Australian international gateway and provide further welcome competition on domestic air travel sectors to the Northern Territory."

"The potential for Tiger Airways to operate domestic services in and out of Darwin and for those services to connect seamlessly with their international services via Darwin International Airport is a very exciting proposition for the NT."

Mr. Kew added "Northern Territory Airports has the terminal facilities to handle such extra flights and looks forward to welcoming Tiger Airways domestic flights to both Darwin and Alice Springs"
